Professional Summary

Results-driven Software Engineer with hands-on experience in full-stack development and business process automation. Experienced in building web, desktop, and low-code solutions that improve operational efficiency through database, APIs, and hardware integration. I adapt business requirements to deliver versatile technical solutions.

Professional Experience

All Code Soft | Acuña, Coahuila

Software Engineer | May 2024 - Present

- Designed and developed end-to-end custom software solutions, including points of sales systems with hardware integration and secure web platforms with role-based access control, improving operational efficiency and data security for clients.
- Worked directly with clients to gather requirements and design technical solutions using UML diagrams, ensuring deliverables aligned with business objectives.

Caterpillar | Acuña, Coahuila

Quality Inspector (Metrology) | April 2024 - Present

- Executed high-precision dimensional inspections using CMMs and FARO robotic arms, ensuring compliance with quality standards and validating critical characteristics (flatness, cylindricity, and diameter), contributing to production defect reduction.

Software Developer Intern (Engineering NPI) | October 2023 - April 2024

- Developed internal applications and Power BI dashboards for engineering teams, enhancing part traceability and production goal tracking.
- Automated operational workflows using Power Apps and Power Automate, achieving an estimated 40% reduction in manual reporting time.

Toter | Acuña, Coahuila

Software Developer Intern (Engineering) | December 2022 – September 2023

- Built and deployed the "Toter Detail Shipment" desktop application using Visual Basic and MySQL to manage inter-plant shipments.
- Managed version control and supported the full development lifecycle using Git and GitHub.

Skills & Technologies

- **Soft Skills:** Problem solving & analytical thinking, adaptability and continuous learning, effective communication with technical and non-technical stakeholders, time management and task prioritization and team collaboration and leadership mindset.
- **Languages & Frameworks:** PHP, Java, JavaScript, React (Vite), jQuery, Visual Basic (.NET Framework)
- **Web Technologies:** HTML5, CSS3, Bootstrap, Tailwind CSS.
- **Data bases:** MySQL, MariaDB, SQL Server
- **Tools & Platforms:** Git, GitHub, Power BI, Power Apps, Power Automate, SharePoint, Draw.io, UML.

Education

Bachelor's Degree in Computer Systems Engineering

Instituto Tecnológico Superior de Ciudad Acuña | August 2019 – Jun 2024

- Graduated as top student of the Computer Systems Engineering program.
- Achieved 5th place in national and international programming competitions.
- Participated in the ICPC International Programming Contest (San Marcos, Texas).
- Developed the Personality Tests intelligent psychology system as an academic project.

Qualifications.

- **Languages:** English (B1 Level, Certified by Oxford University).
- **Certifications:** SQL Certification and GitHub in depth.
